School Report

Committee

A B SHERMAN LOLIE E POWELL ROY M TRASK

Superintendent—J P FULLER

To the Superintending School Committee and Citizens of the Town of Liberty:

I herewith respectfully submit my annual report of the schools of our town.

The financial condition of our school system is back on a more firm basis and I hope that the citizens of the town will see fit to keep it so.

"Education," says Herbert Spencer. "is preparation for complete living, and a complete living consists in dealing wisely with one's mind and body, in training one's children to earn a living intelligently, in performing one's duty to his family and society, and in making a wise use of one's leisure time."

Our rural schools have undergone marvelous changes during the last half century. The little one-teacher schools are more and more disappearing and in their stead, we find large consolidated schools, which are doing much to remedy many of the former unsatisfactory conditions prevailing in rural sections. The curriculum has been remodeled and subjects of special interest to rural pupils have been introduced.

Education by means of study under trained teachers is

the surest guarantee for success in life. All men have their ideas of life, some have ideals. It is when we reach out toward a fuller realizatiou of the latter that we become to some extent what we were intended to be, and the higher and truer the ideal the more perfect the realization, the broader and grander and nobler will be the life attained.

Perhaps at no time in the world's history has the word "destiny" been so full of signficance as it is today. Perhaps at no other period have men so been urged to fight for the preservation of civilization as they are urged at present. In view of this fact, it behooves every man and every woman to do all they can to fulfill the high destiny that divine goodness has made possible to them; moreover, it is the solemn duty of home and school to prepare youths for the combat in which they must take part.

We need a new and more spacious building in the Village so that the consolidation may go on and better instruction and facilities be the ultimate aim.

The Sherman's Corner and South Liberty schools need painting both on the inside and out.

In conclusion I wish to state that I appreciate the cooperation of the school committee, the untiring efforts on the part of the teachers, and the cooperation of the parents and other citizens of the town.

School Report

Committee

LOLIE A POWELL R M TRASK C L STICKNEY

Superintendent—J P FULLER

To the Superintending School Committee and Citizens of the Town of Liberty:

I herewith respectfully submit my annual report of the school system of our town

The time has come when we are badly in need of room to accommodate the influx of high school pupils. The high school building was remodeled to accommodate from 20 to 30 pupils. This year we have 47 in our high school with the possibility of having between 60 and 70 next year

There are 17 tuition pupils at present in our high school which means at a low estimate, an annual income of $1020. Can we afford to pass this up? There will be around 25 tuition pupils next year.

You can interrupt the building of a road and go back to it later, but if you interrupt the decent care of a child you can by no means go on where you left off. A child can not grow up twice.

Our children and young people follow the old worn way to the schoolhouse. There they must find at least the opportunities so freely offered to their predecessors. If there must be a choice, build a schoolhouse and leave a road unbuilt. We must have education, it is America's boast. While other things are crumbling our schools must be maintained.

If schools are a blessing in good times, they are an im-

perative necessity in bad times. They safeguard the health of the child, they fortify the home, they give hope and encouragement to citizens who are victims of misfortune, but who can take satisfaction that their children are cared for. The schools are ourselves working together in the education of our children. When times are hard we need to make that education better—to take more seriously our common task of preparing the young for life.

Let us preserve and improve our schools. Let us keep the children first.

The South Liberty school needs shingling and the Sherman's Corner school needs painting.

The water supply at the high school needs repairs to get pure water.

Respectfully Submitted,

J. P. FULLER

School Report

Committee

R. M. TRASK, C. L. STICKNEY, WILLARD WHITAKER

Superintendent—J. P. FULLER

To the Superintending School Committee and Citizens of the Town of Liberty:

I herewith respectfully submit my fifth annual report of the school system of our town.

Our school buildings are in very good repair and very little more is needed to have as well equipped schools as one will find thruout the State in towns of this size.

The parents and citizens of the town have a right to be proud of their schools. We should all appreciate the help that we have received from the State and Federal Government to repair and equip our schools.

The school is your child's larger home. It shares with you as a parent the faith and the hope that the life of your child will be fine and right. Carefully trained teachers know, even as you know, that the foundations of life are laid in simple, every day habits. They know that the child who is well and happy, who is punctual and regular, who is helpful to his parents, his associates, and his teachers, and who is eager to learn is well on his way toward a good life. The school is a garden of growing children. It has taken centuries of effort to win the right to have schools for children. There have always been those who deny this opportunity. There are those who would deny it now. You as a parent, because of the knowledge of what the school does for your child, will wish to cherish and protect this, your child's larger home. Like clothing, food, and shelter, the common school is one of the primary necessities. Let us safeguard our children's school. It is a garden of growing children.

Schools, more especially public schools, from the town kindergarten to the state university are the main instrumentalities consciously used by the nation to realize its hope of success in popular government and its associated cooperations. They are the chief means for the deliberate improvement of human nature so that it will be able to meet the essential obligations of human life. The school, because it seizes the plastic period of human life and educates deliberately toward definite social and political objectives, has a dependable power,

one which a democratic civilization may rely upon.

The teachers of our town have spent money, worked diligently, and overcome many obstacles to become efficient teachers, yet our teachers are getting less wages than the common laborer receives under the new code. In order to face life's problems successfully, the education of our children must meet no delay or curtailment. Our schools are giving to the children the best modern education at the least possible cost.

May we recall the courage of those who settled a wilderness, the vision of those who founded the nation, the steadfastness of those who in every succeeding generation, have fought to keep pure the ideal of equality of opportunity, and hold clear the goal of mutual help in time of prosperity as in time of adversity. May we ask guidance in more surely learning the ancient truth that greed and selfishness can never bring lasting happiness or good to the individual or to his neighbors.

In behalf of the school department I wish to express my appreciation to the following who so generously offered their services for the cause of education.

In spite of the trying times which we are passing through the schools have not suffered for efficient teachers. They have given their time earnestly without thought of pecuniary gain.

I wish to thank the School Committee and the citizens of the town for their cooperation and support.

Respectfully submitted,
J. P. FULLER.

School Report

Committee

C. L. STICKNEY WILLARD WHITAKER
A. B. SHERMAN

Superintendent—J. P. FULLER

To the Superintending School Committee and Citizens of the town of Liberty:

I herewith respectfully submit my sixth annual report of the schools of our town.

We have the same corps of teachers which we had at the close of last year and they are all doing a splendid piece of work. Our schools are maintaining a high standard in scholarship and the pupils are making good progress when we consider that our town is in the lower expenditure level.

Our school buildings are in very good repair, however we have reached a point regarding our high school where we must do one of two things. We must make room for the influx of non-resident pupils or turn them away to have them attend school elsewhere. Our school has not reached its maximum attendance. Liberty is geographically located so that it would not be impossible or improbable to build a large high school center.

We are blessed with good roads leading to our town from all direction, but before we could hope to solicit

more pupils we must provide adequate facilities for those pupils, and I believe that it would be good business for the town to provide these facilities.

Our high school has increased nearly 300% during the past five years in enrollment and it would not be impossible to double the present enrollment, providing we had the facilities to accommodate them. Not only would non-resident pupils profit by such a move, but our own pupils would benefit by the choice of more courses, more individual attention, specialized teachers in the subjects offered, more departmental work, better classroom and laboratory facilities to give the pupil a fuller and more varied education.

Education must be expanded to meet the needs of tomorrow, and must be adapted to a socialized community against the background of leisure. Education must not only furnish mastery of the tools to be used by every human being in securing food, shelter, and clothing, but it must make each one a civilized being by giving him some knowledge of music, a speaking acquaintance with art, a reading experience in good literature.

If leisure is to be more than idle hours, spent in the movies or on the road, it must be glorified by an appreciation of music and drama and literature. The use of our leisure will determine the character of our civilization and the length of its existence.

Payson Smith has said that "education is at the cross-roads; the times demand radical changes in its curriculum." We face a period of change: whatever changes may occur, must be directed towards giving richer, more liberal opportunities to each individual child. The General Federation goal is ever before us, the enrichment of life through a better adjustment of human relations.

All pupils do not fit into the same mold, therefore

we must adjust the courses to fit the pupils needs. In the small high school with only two teachers we must run all the pupils into the same mold with little or no consideration for differences in physical or mental makeup and expect them to come out the same, which absolutely cannot be done. Human beings are as different as day and night and those differences must be accounted for.

I wish to thank the teachers, the school committee, and other citizens of the town for their cooperation and support.

Respectfully submitted,

J. P. FULLER

I have endeavored to show you in the foregoing financial statement, where and how the money appropriated at the last annual meeting has been expended.

School opened Sept. 3rd. with the following enrollment as to school.

High School	62 pupils
Grammar School	28 pupils
Primary School	20 pupils
Sherman's Corner School	20 pupils
South Liberty School	28 pupils

Total enrollment of all schools 158 pupils.

We feel that the work in the schools this past year has gone on smoothly and that the results have been gratifying. We invite you to visit us and offer suggestions where-by we may serve you better.

I believe we should require all teachers to be Normal

School graduates, feeling that the present day system of schools need trained teachers to carry on the work successfully.

The attendence has been very good, I am pleased to state that only on two occasions has my attention been called to pupils in reference to their attendence

The text-books are in very good condition and the schools are fairly well supplied. I feel that we should stress more on our reading system, I find that our pupils are handicapped throughout the grades by not being able to read understandingly. We should establish a reading system in our schools with plenty of supplementary reading. Outside reading in the home should be stressed by the parents and teachers.

On Sunday night December 30th., the High School Building burned with most of the contents. The Superintending School Committee at once called a meeting to take necessary steps to secure temporary quarters to house the school for the remainder of the year.

Through the generosity of the directors of the Comunity Hall, we are housing the high school and primary school in the basement of the Community Hall. The work in these two schools is being carried on in a very satisfactory manner. The grammar school is being conducted in the rooms over Clark's store. This school adapted itself at once and is doing a fine piece of work.

(Mrs. Gladys Spearin, Rural Worker for the State Department of Education has just recently visited us in our temporary quarters and commented on the fine work we were doing under these conditions.)

At this time I want to thank Mrs. Alice Sanford for her kindness and generosity in making room for the grammar school, Mrs. Sanford assumed all expense in getting this room

ready (including lighting).

I pause at this moment to find words suitable to reach you in appealing to you for the rebuilding of our High School.

At present we have 43 resident pupils attending school in our town, next year we will have at least 50 resident pupils, and due to our central location we can easily draw tuition from Searsmont, Montville and Palermo; investigations that I have recently made has proven beyond a doubt that we can draw 40 tuition pupils from the three above mentioned towns. I am of the opinion of your former superintendent it would be good business to erect a building that will house 200 pupils (including grades).

I ask you for your consideration on this question. We will talk it over at our annual March meeting.

In closing I wish to thank the citizens of Liberty for the courteous treatment accorded me during the past year, and to express my appreciation of the support and cooperation of the superintending school committee and teachers.

Respectfully submitted,

JASON R. TIBBETTS

Superintendent of School.

I have tried to show you in the foregoing financial statement where and how the money appropriated at the last annual meeting has been expended.

Schools opened Sept. 8th with only one change in our teaching force—Mr. John Boynton was secured to fill the position left vacant by Mr. Earl Achorn.

We started our schools again this year in the Community Hall and Sanford's Hall. The work has gone on very smoothly in these temporary quarters.

South Liberty and Sherman's Corner schools are both in fine condition; our programs are being carried out in these two schools in a very able manner.

After two weeks of the winter term we moved into our new building, both teachers and pupils have adjusted

themselves and are starting out on a new program. At this time I would like to call your attention to the closing of the Sherman's Corner school, part of these children are conveyed at present and at a small additional cost.

The rest of these children could be conveyed to the village. By closing this one school the town would be able to save at least $500.

The loss of text-books and equipment has been a great hardship upon the Town of Liberty. At present we are well equipped again. Following is a list of the amounts we need to raise at our annual meeting to square us with the book company.

Ginn Book Co.	$378.01
Am. Book Co.	343.12
Lyons & Carnahan Co.	63.55
MacMillan Book Co.	18.67

In closing this brief report I wish to extend my sincere appreciation to the teachers and students for their hearty co-operation given me during this past school year.

Respectfully submitted,

JASON R. TIBBETTS

The general success and efficiency of a school system

is in a large measure dependent upon the personel of its teaching staff.

Professional fitness through training in our normal schools and colleges coupled with successful teaching experience make up an essential foundation. Unless there is some degree of permanency in the teaching staff the maximum of efficiency cannot be obtained. In the selection of our teachers your school committee and superintendent have recognized and applied these principles as far as conditions made it possible to do so.

Of the seven teachers employed four are normal school graduates and the three High School Teachers are college graduates. You have a very faithful and efficient corps of teachers, who are endeavoring to give the childr n of Liberty the necessary training which will tend for better citizenship.

The lack of visitation upon the part of the parents is a matter which should cause concern. Unless there are special exercises, it is unusual to see parents in our schools. The plea that lack of time is the cause for this, to me seems a very poor excuse. If the parents were as interested in the welfare of their children as the teachers are, we would have greater results than are now being achieved. There is no shirking of work or responsibility upon the part of the teachers and any request involving extra time and work meets with a ready response on their part. Their aim is to train the entire child, body, mind and spirit. It is difficult to measure from day to day the results of a teacher's work, but if we are to judge from the reports that come from other school systems, where our pupils go, we would feel proud of the work which is being done for the boys and girls of Liberty.

Extra curricular activities are playing an important

part in our schools this year. With our few teachers the tasks assigned to each teacher has been many. No superintendent could expect better cooperation from his teachers than has been rendered this year. All of our grade schools had a fine program at Xmas., which was a credit to both pupil and teacher.

Our High School athletic program has consisted of Basket ball and Hand ball for both boys and girls. Considering the competion which we have had, I feel we have done remarkably well from the winning standpoint. This, after all, should not be our chief aim for if we consider only the winning of games as our object, we defeat the very purpose of athletics whitch is to teach true sportmanship, clean play and the development of a sound mind in a sound body.

With the beginning of the winter term the daily schedule in our high school was altered somewhat by the initation of a rotating schedule.

This type of schedule is being used extensively by the smaller schools of the state because of it's flexibility, allowing time for activity, conference and assembly periods.

For the first time the school is undertaking the editing of a school paper which will be on sale in June. The material in this paper will be wholly the work of the High School Students.

Following is the number of pupils as to grade in our school system:

Walker High School

Freshmen	Residents 8	Non-residents 12
Sophomores	Residents 11	Non-residents 9
Juniors	Residents 11	Non-residents 4
Seniors	Residents 12	Non-residents 4

Grade Schools

First Grade	10
Second Grade	7
Third Grade	9
Fourth Grade	13
Fifth Grade	7
Sixth Grade	17
Seventh Grade	10
Eighth Grade	13

Total number in our system 157 pupils

It is with regret that I have to present to you a report

of your schools showing such a large overdraft. There is considerable explanation necessary, which I will not attempt to make complete in this report as pages of print cost money.

After your high school was destroyed by fire, it was necessary to purchase many new books. These books were bought on a running account with the anticipation of absorbing a part of the bills each year. I felt to make any showing of my work whatever it would first be necessary to start with a clean sheet. Since becoming your superintendent I have only spent for text books and supplies $134.65, the balance was expended previous to Sept. 26th.

Another matter of much financial concern is in regards to teachers' pay. During the year 1937-1938 you will find that your secondary teachers were paid for only 32 weeks and your elementary teachers were paid for only 28 weeks. If your teachers had been paid up to the time of settling books there would have been a much greater overdraft for 1937-1938. This year you will observe your teachers have been paid 38 weeks in the secondary school and 34 in the elementary school. This was done to make up for last year's deficiency in part, and also to give our teachers more than one weeks pay to last from Christmas to the middle of March.

There has been some request for a reduction in our school budget but I feel for the next few years it will be almost impossible without considerable detriment to our excellent school system.

The following is a temporary budget for your consideration.

Teachers' salaries	$4,760.00
Fuel	300.00
Text books and supplies	600.00
Janitors	500.00

Conveyance		1,400.00
To absorb deficit		400.00
Total		$7,960.00
State School Fund		$1,200.00
Equalization		1,300.00
Tuition on 25 students		1,500.00
		$4,000.00
Necessary to raise by the town		$3,960.00

Proposed budget

For common schools	$1,700.00
For secondary schools	1,700.00
For text books and supplies	600.00

For repairs I also recommend $300.00, $240.00 of which is to cover insurance on the Walker High School.

Many people are willing to make suggestions for reducing our expenditures but most of these suggestions would be such a detriment to our schools that wise voters would not approve. There is however one good opportunity for making a saving, and at the same time making a great step forward in giving our children all the benefits of a splendid central school. I know many people have a desire to keep "The Little Red School House" but I know if you could visit the Shermans Corner School and then visit the Walker Building, noting comforts of heat, light, toilets and the advantages of having only four grades in a room, I know you would sacrifice all to give the best to your children.

The morning on which I composed this statement (Jan. 18) I called at the Shermans Corner School and found the

teacher with her overcoat on and the children crowded around the stove suffering from cold, while at Walker all rooms were comfortable.

If we could close the Shermans Corner school we would	
get from the state for transportation	$100.00
we would save teacher's salary	480.00
janitor and fuel cost	75.00
Total	$655.00

All extra cost we would incur would be in added conveyance which should not amount to more than $200.00. We would also loose $100.00 per year after the first year from the state due to the loss of one teacher.

Considering these figures we could save about $450.00 the first year and about $350.00 each year thereafter.

Our teachers are doing good work and need to be complimented, not only by their superintendent, but by parents and friends. When a person does a good job he likes to know it is appreciated and if a complimentary remark is made he will work all the harder. I hope you folks put yourselves out to say a good word when one is deserving.

The best teaching is obtained by having teachers retained for several years. You recall perhaps that this statement was made by my predecessor. It is like a sermon that a minister preached for six weeks in succession, with the final remark "I might as well preach the same sermon until I begin to see results." I know having four new teachers in town is not a fault of yours but by your friendly cooperation and financial support I know we can hold teachers for a longer period of time in the future.

I must at this time thank publicly your town officiers,

the selectmen, treasurer, and school committee for their aid in paying up old bills and also in keeping your teachers paid up to date.

Respectfully submitted,

Art. 28 To see if the town will vote to authorize the selectmen to sell and dispose of all tax titles or other property held by the town, on such terms as they deem advisable, and to execute and deliver quit claim deeds for same.

Art. 29 To see if the Town will vote to authorize the selectmen to execute and deliver in the name of the town its note or notes payable to The First National Bank of Belfast, Maine, in an amount not exceeding ($1,000.) in payment of the present indebtedness of the Town to said

Bank.

Art. 30 To see if the town will vote to authorize the Selectmen to procure a temporary loan or loans not exceeding ($,4000.) and to execute and deliver, in the name of the Town, its note or notes therefor, said loan or loans to be paid out of the money raised by taxes during said current year.

Art. 31 To see whether or not the Town will vote to enter into a contract with Central Maine Power Company for a term of ten (10) years substantially in the form to be presented to the meeting, whereby, in consideration of the extension by Central Maine Power Company of its lines beginning at the Church located in South Liberty at a point where the Burkettville Road, so-called, intersects the road leading to the Town of Washington, thence extending southeasterly along the Burkettville Road to the town of Appleton, a distance of approximately 1.2 miles, all as more fully described in said contract, and in consideration of such other and additional line extensions as may be constructed under the terms of the contract, and in consideration of the company's furnishing and delivering to the Town electric energy for the operation of one street light located at South Liberty, the Town will agree to pay to Central Maine Power Company during the term of the contract for the electric energy furnished for the operation of said street light the sums prescribed by the company's schedule of rates as the same are now

or hereafter may be filed with the Public Utilities Commission of Maine for the type and character of service furnished, which amount shall not be less than $12.00 per year, beginning with the effective date of the contract, for said street light, and in addition, to pay to the company annually for the term of the contract, beginning with the effective date thereof, a sum equal to all taxes assessed, imposed or levied by the Town upon the above described line extension and such additional line extensions as may be constructed by the company during the term of the contract for the purpose of rendering electric service to those inhabitants of the Town who do not have electric service as of the effective date of the contract.

Art. 32 To see what action the town will take with reference to authorizing the selectmen in the name and on behalf of the town to execute and deliver to Central Maine Power Company the contract referred to in the preceding Article.

Art. 33 To see what action the town will take with reference to raising sufficient sums of money by borrowing or otherwise to provide for the payments to become due during the fiscal year 1940 under the terms of said contract.

Art. 34 Transact any other business that may legally come before said meeting.

Hereof fail not and have you there and then this warrant with your doings theron.

The selectmen hereby give notice that they will be in session, for the purpose of revising and correcting the list of voters, at the town office at nine o'clock in the forenoon on the day of said meeting.

Given under our hands this 7th day of February, A. D. 1940.

PROPOSED BUDGET

Teachers' salaries	$5,000.00

Conveyance	1,400.00
Janitors	475.00
Fuel	275.00
Textbooks and supplies	800.00
To reduce overdraft	400.00
Total needed	$8,350.00
State school fund	$1,200.00
Equalization	1,723.00
Tuition	1,400.00
Interest on school fund	65.00
To be raised by town	4,000.00

I also recommend $240 be raised for insurance and $100 for repairs.

In my report of 1939, I proposed a budget for the following year by which we could retire $400 of the overdraft which existed at that time. Your committee worked carefully, and without lowering the standard of your schools reduced the overdraft by $517.60. There are a few places where further economy may be justified, but at the same time we will find it necessary to purchase more textbooks and supplies than during the last year.

Your committee and I feel we should be achieving some of the aims relative to equalization. This fund is provided to needy towns to raise the educational standards of those towns. It is recommended that we especially stress a higher wage level and also a lengthening of the school year. Many towns have lengthened their school year, and we feel we should add two weeks to our elementary school.

Just before the close of school in June, your committee was notified that the sewage disposal at the Walker building was condemned. A temporary job was done until

arrangements could be made for a permanent disposal area. The following will serve as a permanent record of the project in case of needed repair, and also to inform the the public of what was done:

The outlet from the septic tank is located at a point 46 ft. from the westerly corner of the building and 39 ft. from the westerly pillar at the left of the entrance. From this point cast iron soil pipe runs in a westerly direction to a point about six feet northwest of a maple tree located near the boundary of Lampson and Ripley. At this point the pipe turns to a southwest direction and runs nearly parallel to the Lampson and Ripley line for 100 ft. to a dry well. Twenty feet farther is a second dry well and 20 ft. farther is a third. These dry wells are connected with land tile. From each dry well there are filter beds which extend, at right angles to the pipe line, in a north westerly direction. The first and second are 20 ft. long and the third is about 50 ft.

I wish to state here that we received splendid co-operation in getting most of the work done without cost, and that all of the labor was taken care of without cost to the town.

The premiums on our insurance for the Walker Building are $300 a year, less a 20% discount. We may take a three year policy for 2½ times the cost of a one year policy, which would amount to $750. At the end of the three years there would be the usual 20% discount, or $150. If we renew for three years it would be advisable to appropriate $450 to be raised over the next two years.

A Little Philosophy of Education.

For many years our high schools have retained the policy of preparation for college, with little regard for what the student will be likely to do in life. We must

still fit students for college but we must make our major program that of preparing children for life. Many of our children stay at home and many more should, and would, if they were prepared for that type of work. We have been lead to believe that farming is a last resort, when all other efforts fail, but this is not true. Agriculture is an honorable occupation, and a farmer can only be successful in so far as he considers it as such. To be a successful farmer one must also be a scientific farmer and this education can not be entirely learned as an apprentice.

To-day in a social world one must also be prepared for society. It is with these thoughts in mind that we are not requiring algebra, French and Latin of all students, but are requiring English, social studies and sciences. It is also with this thought that we are having a course in social problems, economics and plan to have a course in general mathmatics. We should have a course in agriculture and home-making but all this will take time.

We are making excellent progress with our scholastic work, but we are failing in one of our major aims in education, health. Many of our children have bad tonsils and many more have poor teeth. Some people may feel that this is a home problem, but we support our schools today to produce citizens of tomorrow. A child cannot get the most out of his school work, if he is poisoned with diseased tonsils and teeth. In many cases parents can't afford to pay the full cost of the needed correction. It is in this work that we solicit your help during the next year. In many cases tonsils can be removed at a much reduced rate if sponsored by some charitible institution. I wish we might also have a dental clinic for one or two days.

I would feel my report incomplete without mentioning the fine cooperation of the public. We were all pleased with the flag which was presented to the school by the

Bradstreet Camp, Sons of Union Veterans and Auxiliary. We were also pleased to receive another flag from an unpublished donor. In June the local Farm Bureau presented the school with a splendid lawn mower for which we are exceedingly grateful. Mr. and Mrs. Burkill showed their ever ready school spirit when they gave a piano to the primary room, and cooperation was not lacking when we had a bee to work on the sewage system. We also appreciate Mr. Walker's never ceasing interest and help with repairs and work about our building.

There were many other cooperative deeds which I will not attempt to mention, but I must add that it is through community interest and cooperation that our good schools are maintained.

Respectfully Submitted,

MERLE S. JONES

Some people feel we should reduce our school appropriation, but this would be very unwise. The slightest reduction in our appropriation would in turn reduce our equalization by over $200. and ultimately force us to raise $4,000. if not more, and in the meantime our schools would depreciate in efficiency rather than continue in improvement.

I recommend $4,000. be raised for the support of schools.

Repairs And Insurance

Raised by town	$340.00	
Dividend from insurance	20.00	
Total resources		$360.00
Overdraft	$ 51.90	
Insurance paid	417.02	
Repair orders	71.60	
Total expenses		$540.52

Overdraft Feb. 1, 1941	180.52
Due on insurance dividends	$40.00

We renewed our insurance with the Federated Hardware Mutual Insurance Co. at a much reduced rate. Next year we need $182.25 for insurance, $75.00 to reduce overdraft, and $75.00 for necessary repairs.

I recommend $340.00 for repairs and insurance.

In 1917 the Commission on the Reorganization of Secondary Education reported its seven aims in education in the Cardinal Principles of Secondary education. They are the objectives of health, command of the fundimental processes, worthy home membership, worthy use of leisure, citizenship, vocations, and ethical character. In general little has been done to accomplish these aims even though they are accepted by educators in general.

What I wish to do in my report is to analyze our schools, especially the high school, and see what we are doing to accomplish the accepted aims of education.

Health—

Much of our health work is accomplished through the physical education program. You are all acquainted with our sports, but perhaps you are unaware that we are trying to get all to take part in some form of athletic activity. During the winter months we are having all students devote one hour weekly to physical culture. During the warmer part of the year we foster baseball, soft ball, and track events to provide healthy activity to as many as possible. With the aid of surplus commodities we are serving hot lunches to as many as wish. This is done to help build up resistance to the many contagions which prevail when we are shut in so much of the time. We also help achieve this aim through the activity period by having safety education taught, and through outside speakers.

Command of the Fundimental Processes—

This was practically the only aim stressed up to within a few years. I hope we are still achieving that aim through English, mathematics, science and history.

Worthy Home Membership—

There is little direct teaching or aid given to our students to make them better members of the family. Here is where we need to improve our educational program.

Worthy Use of Leisure—

We are making progress with this aim but there is still a long way to go. There are over twenty boys and girls in the Walker building taking music lessons, we have a good library started which is being used by most students, we have many magazines which create a desire and habit of reading, and there is opportunity to take part in various sports. There are however many hobbies and activities which are not encouraged to the greatest extent. We must try to create an interest in nature, collections, gardens, sewing, drawing, woodwork, and even in card playing, dancing and in cultivating a good taste in selecting radio programs. To carry on many of these activities, which are necessary to our educational growth, we solicit your aid.

Citizenship—

Through our history courses, civics, world history, American history, and problems of democracy; we are doing much to achieve this aim. We also accomplish much in the social activities of the school. In all of our school work democracy is foremost in the mind of the teacher.

Vocations—

We are still many years behind educational principles in this aim. The major part of our educational program is still to prepare men for college and for the higher professions. How few graduates of Walker will make use of

French, algebra, geometry, and advanced science. In my proposals below you may note how we can modernize our our program to partly achieve this aim.

Ethical Character—

There is no regular course of ethics in our high school, but in all school relationships an attempt is made to develop the highest standard of moral character. Discussion of etiquette finds its place in many classes. It is not uncommon to find classes in general science or economics discussing some phase of social behavior.

Now you may ask, "What can we do about it?"

I feel we should have a course in homemaking for all girls and have it elective for boys. Without an instructor in home economics the course would have to be revised from that taught in our larger high schools, but it could aid considerably in further achieving our aims of; worthy home membership, worthy use of leisure, vocations, and ethical character.

We have purchased two typewriters and plan to get two more as soon as our budget will allow. This will give opportunity for many to get a few fundimentals of typewriting.

I feel living in a rural community, we should have an agricultural course. This course does not only teach the elements of farming but it also includes the mechanics of modern farm work and also simple woodwork. The government pays one-half of the teacher's salary and the State will allow the town to add its share to the cost of a minimum program in determining equalization, thus it would cost us less than $400.00, over one-half of which would be paid in tuition.

Last year we received several worthwhile gifts from local organizations. This is a plea for further aid. We need supplies for the lunch room.
